ABSTRACT OF THE DISCLOSURE

A method and arrangement are disclosed for attaching one or more electrical bayonet-type blades to a circuit board. The arrangement comprises a circuit board with at least one opening adapted to receive one blade. A solder pad disposed on at least one surface of board surrounds the opening. A plurality of vias surround the opening. The vias are disposed such that they pass through the solder pad. Solder is applied around the electrically conducting bayonet on one surface of the circuit board, through the vias, and around the electrically conducting bayonet of the surface of the circuit board opposite to the solder pad.
